Response

1. The response filed on 12/19/2009 has been received and made of record.
2. Applicant's argument with respect to claim 17 is moot in view of new grounds of rejection(see below).
3. claims 1-11 and 14-18 are allowed.
4. claims 12-13 and 19 will be allowed if overcome the indicated objection.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claim 17 is rejected under 35 U.S.C. 101 based on Supreme Court precedent and recent Federal Circuit decisions.

A 35 U.S.C § 101 process must (1) be tied to a particular machine or (2) transform underlying subject matter (such as an article or materials) to a different state or thing. In re Bilski et al, 88 USPQ 2d 1385 CAFC (2008); Diamond v. Diehr, 450 U.S. 175, 184 (1981); Parker v. Flook, 437 U.S. 584, 588 n.9 (1978); Gottschalk v. Benson, 409 U.S. 63, 70 (1972); Cochrane v. Deener, 94 U.S. 780,787-88 (1876).

An example of a method claim that would not qualify as a statutory process would be a claim that recited purely mental steps. Thus, to qualify as a § 101 statutory process, the claim should positively recite the particular machine to which it is tied, for example by identifying the apparatus that accomplishes the

Art Unit: 2457

method steps, or positively recite the subject matter that is being transformed, for example by identifying the material that is being changed to a different state.

Here, steps of the method claim 17 are not tied to a particular machine and do not perform a transformation. Thus, the claims are non-statutory.

Specification

6. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: For example, the “computer-readable medium” language in claims 12-13 and 19 lack proper antecedent in the specification.
